

## QUALITY AND INFORMATION SECURITY POLICY

1928 Diagnostics continuously strives to offer well-designed, efficient, and safe products and services that provide benefits to our customers and the health care system.

1928 Diagnostics is devoted to act towards our customers and partners with professionalism, engagement and honesty while practising high ethical standards. Customer feedback is valued and contributes to developing improved products and increased customer satisfaction.

1928 Diagnostics fosters a company culture that ensures high quality by encouraging accountability, creativity, openness, knowledge, and teamwork.

### 1928 DIAGNOSTICS IS COMMITTED TO

- implement, and continuously evaluate, and improve ways of working that assures compliance with applicable regional, national, and international standards and applicable requirements (customer and regulatory included), for products and management systems.
- ensure the availability and reliability of the products and the services throughout the entire lifecycle by applying a risk management approach to processes and ensuring business continuity.
- protect the confidentiality, integrity, and availability of information and data by implementing security measures and working with trusted suppliers.
